HALF YEARLY

TOUCHPAD Computer Applications -Orange Education Pvt Ltd					
Ch No.	Name of the Chapter	Topic	Ch No.	Name of the Chapter	Topic
1	Introduction to OOP	OOP	11	User Defined Methods	Function definition advantages, invoking methods
2	Elementary concepts of obj &	What is object, Encapsulation, class			Returning from a function
3	Values and Data types	Abstraction, Object factory			Pure & impure method
4	Operators in Java	Byte code, Operation & expression			Function overloading
5	Input in java	Data types, Tokens, Variables			Calling of overloaded functions
6	Mathematical library Methods	Constants, byte code			call by value (programs), call by reference (only definition with an example.)
7	Conditional construct in java	Method main			Static and nonstatic methods
8	Iterative constructs in Java	Java character set Decision making Statements Programming structure	12	Constructors	What is a constructor? Need of it. Types of constructor, this keyword Constructor overloading. Constructor vs Method
	Revising basic java concepts	Selection statement (if and switch)	16	String Handling	Creating string Methods used in string- Definition with an example String array
		Obtaining input using Scanner class			Object, class, creating object, object factory. using this keyword.
		Object, Class	10	Class as the basis of all computation	
		Member variables			
		Object implementation			
		Instantiating an object, Access specifier			
		Object as an instance of class			
9	Nested Loop	Utility and application of nested loops.	Syllabus for Half yearly including Project Work (20 programs from If else & switch, loop, Constructor, Method overloading, String functions) Ch- 1,2,3,4,5,6,7,8,9,10,11,12,15,16 & project submission (1st part) on or before 02/08/2022 (1st part) Appropriate portions from the topics taught in Unit I and Half Yearly shall be covered		
15	Arrays	Need of arrays, Creating an array			
		Types- Single dimensional array			
		storing value in 1D array			
		Searching: Linear & Binary Search			
		Sorting: Selection & Bubble Sorting			
		Accepting data in 2D array, sum of the elements row, column, and diagonal element			
		Array in matrix format. Arrays vs. object.			
		Advantages and disadvantages of arrays			

All portions taught

Syllabus for UNIT I : Ch 1,2,3,4,5,6,7,8,9,15 and Practical programs to be practiced.
